

Advanced Tools for Water Treatment

Advanced modelling, control and decision support tools
for flexible and optimal wastewater treatment plants

This event is co-financed by the European Commission
through the involvement of several projects.

A joint event organized by:

Hosted by National Geophysical
Research Institute (NGIR - CSIR).

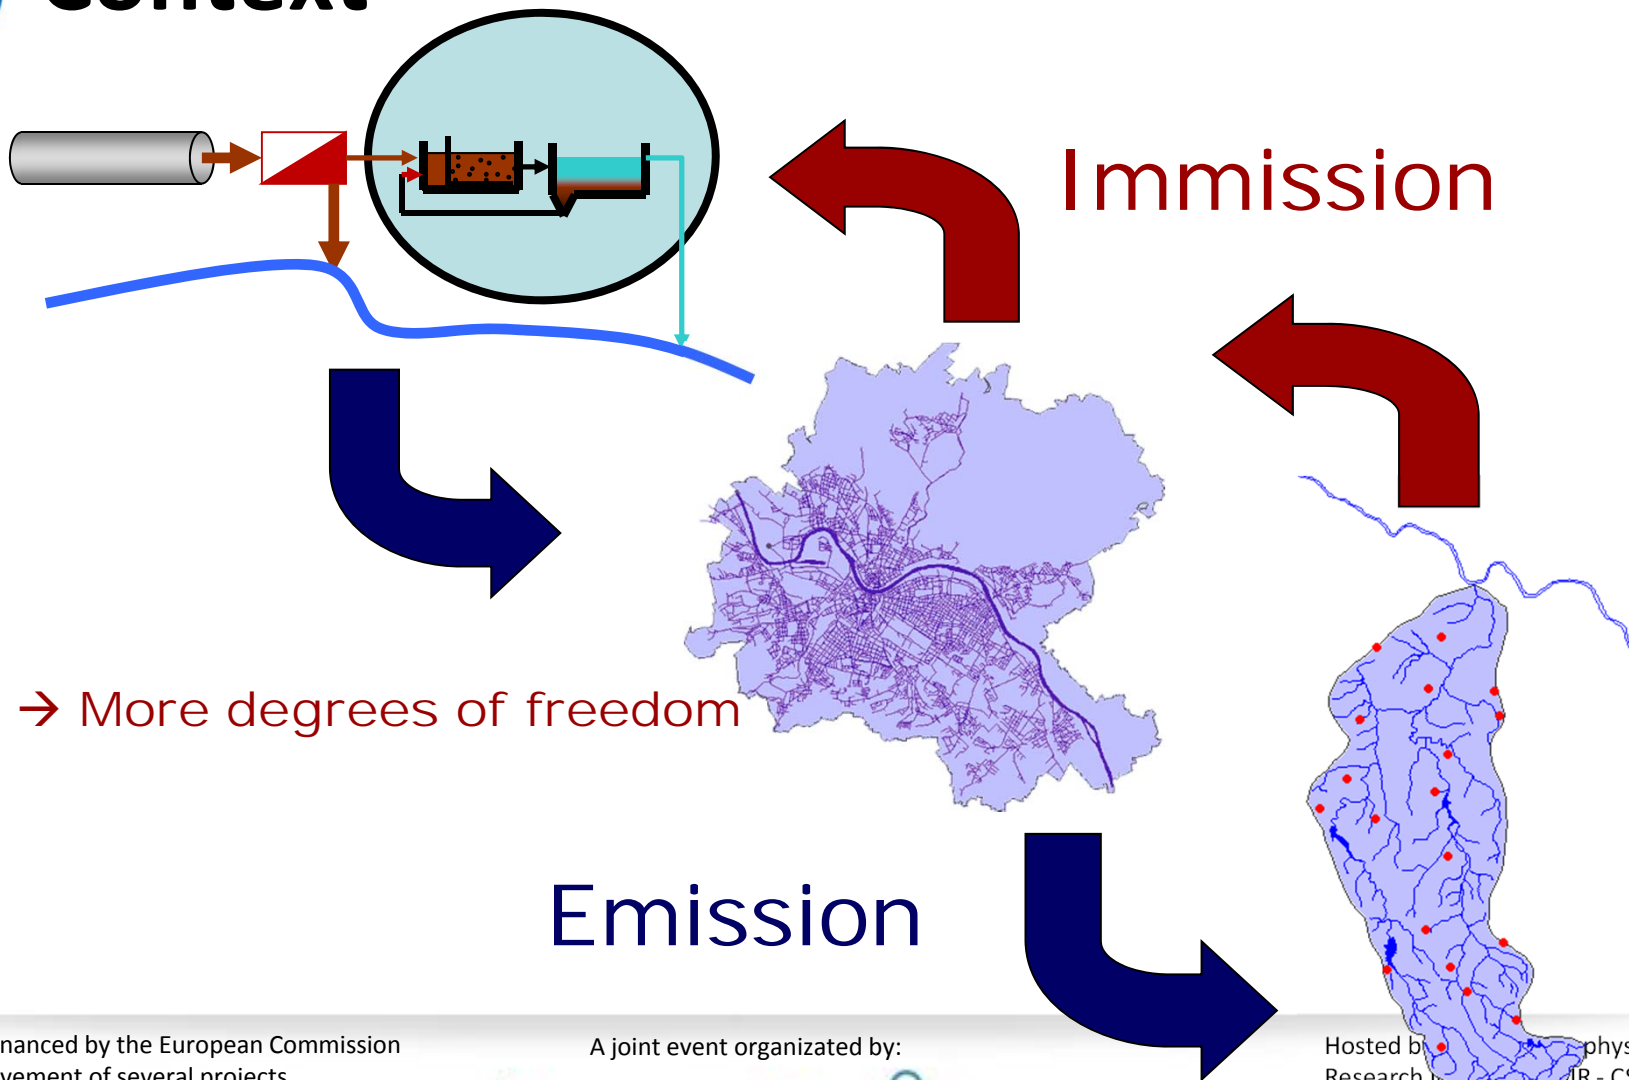

AtWat partners

- India
 - CSIR-NCL Pune (**Vivek Ranade**)
 - NIT Tiruchirappalli (Seshagiri Rao)
 - Pondicherry Engineering College (Raman Saravanane)
- EU
 - BIOMATH – Ghent University, Belgium (**Ingmar Nopens**)
 - Lequia - Univ. de Girona, Spain (Quim Comas, Ignasi Rodriguez-Roda)
 - Catalan Water Agency, Spain (Jordi Robusté)

Context

This event is co-financed by the European Commission through the involvement of several projects.

A joint event organized by:

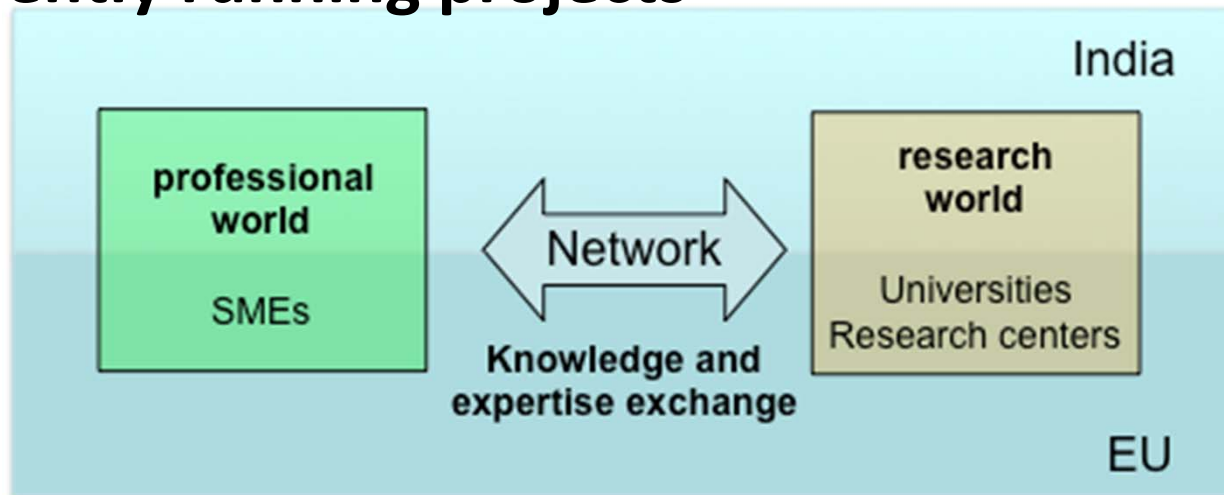

Hosted by the Physical Research Institute (IR - CSIR).

Objectives

- **Create** a EU – India **network** to improve sustainable wastewater management in both regions
- **Exchange ideas and expertise** and embed them in **currently running projects**

This event is co-financed by the European Commission through the involvement of several projects.

A joint event organized by:

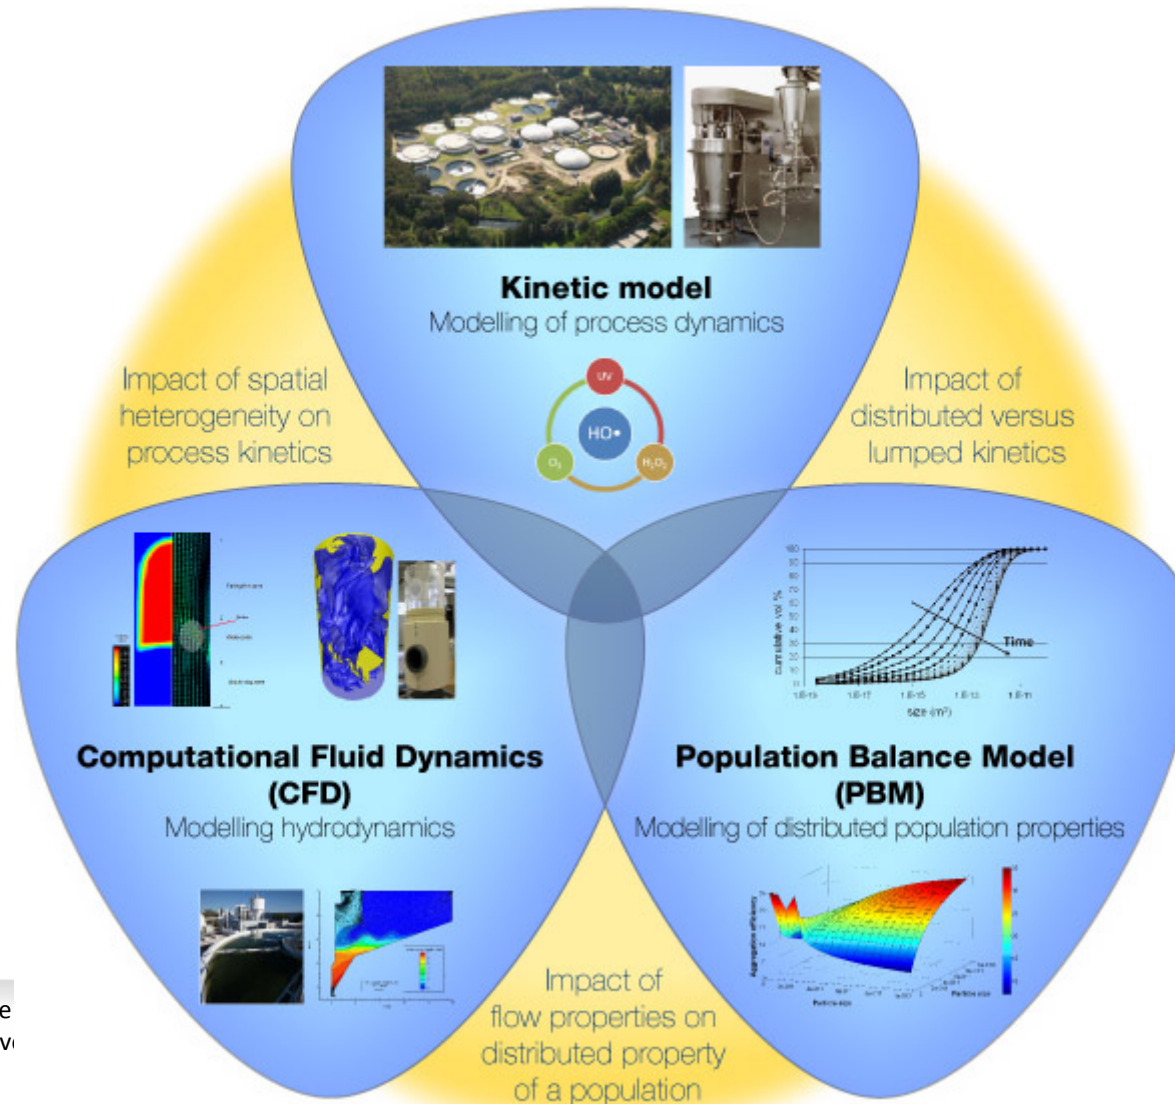

Hosted by National Geophysical Research Institute (NGIR - CSIR).

Advanced modelling

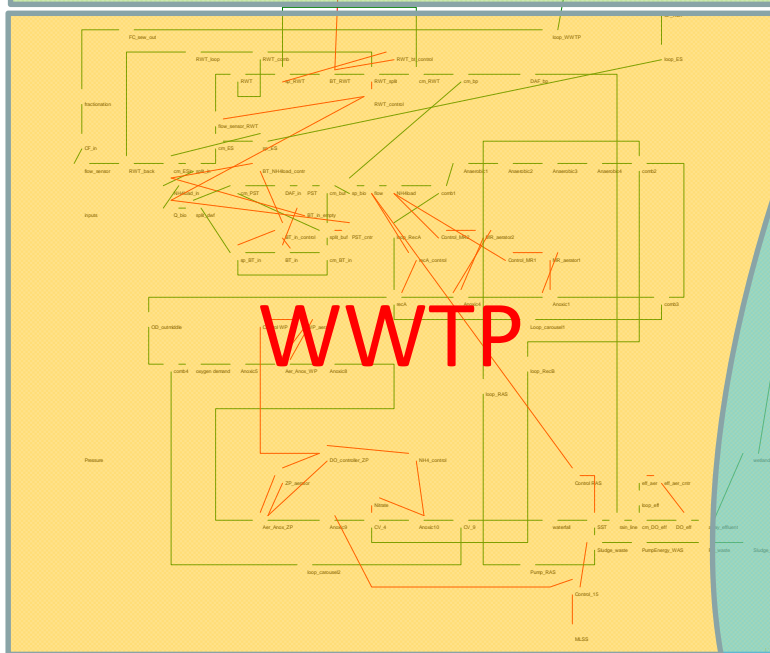

This event is co-financed by the through the involvement of sev

lost by National Geophysical research Institute (NGIR - CSIR).

This event is co-organized through the initiative of

Geophysical
NGIR - CSIR).

Advanced modelling

- Mixing

- CFD-biokinetics

This event is co-financed by the European Commission through the involvement of several projects.

Hosted by National Geophysical Research Institute (NGIR - CSIR).

Advanced modelling

- Settling

This event is co-financed by the European Commission through the involvement of several projects.

A joint event organized by:

Hosted by National Geophysical Research Institute (NGIR - CSIR).

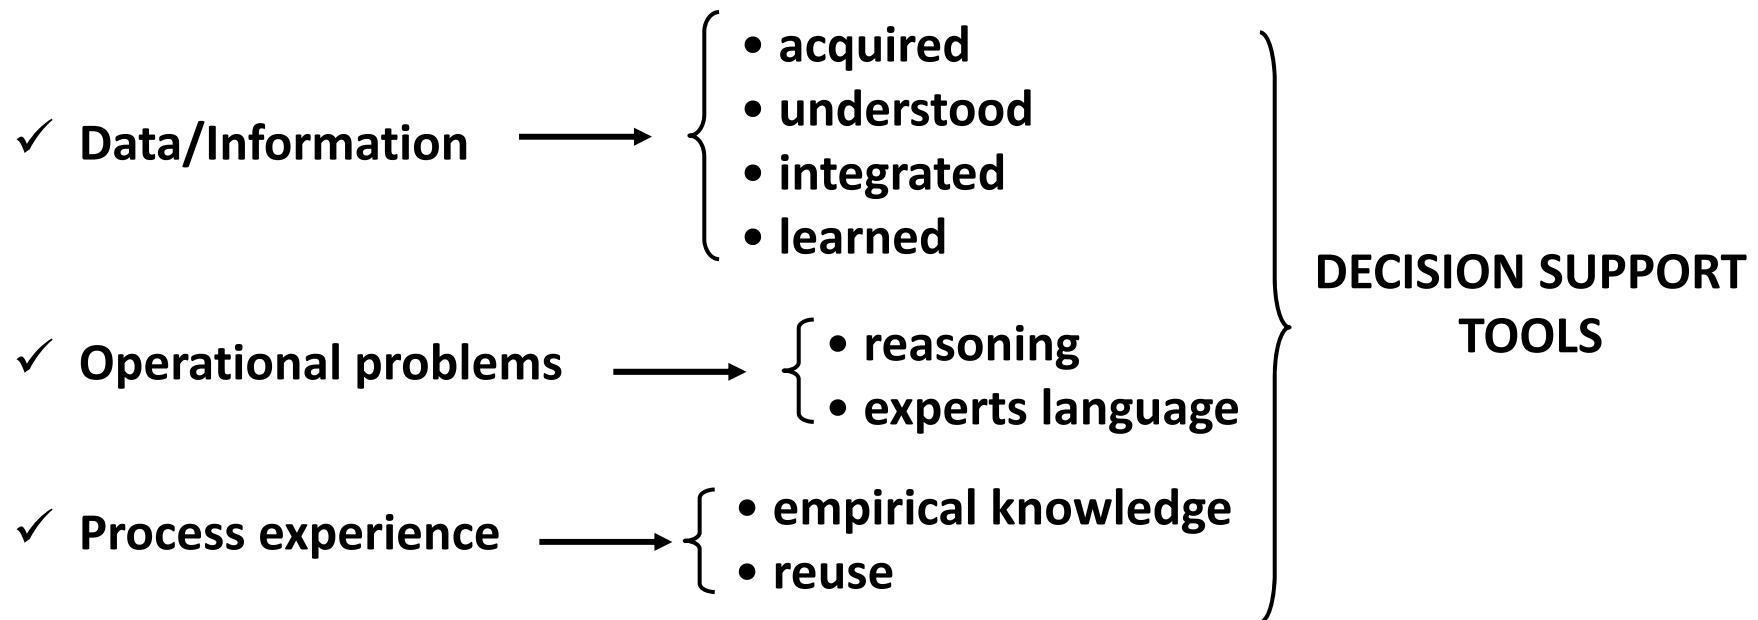

Advanced control

- Nonlinear analysis to study the effect of the external and internal recycle flow rates on the operability.
- Cascade control strategy to improve the closed loop performance.
- Effect of measurement time delays on the plant performance.
- A comprehensive study on whether complex control schemes are really required for efficient operation of WWTP.

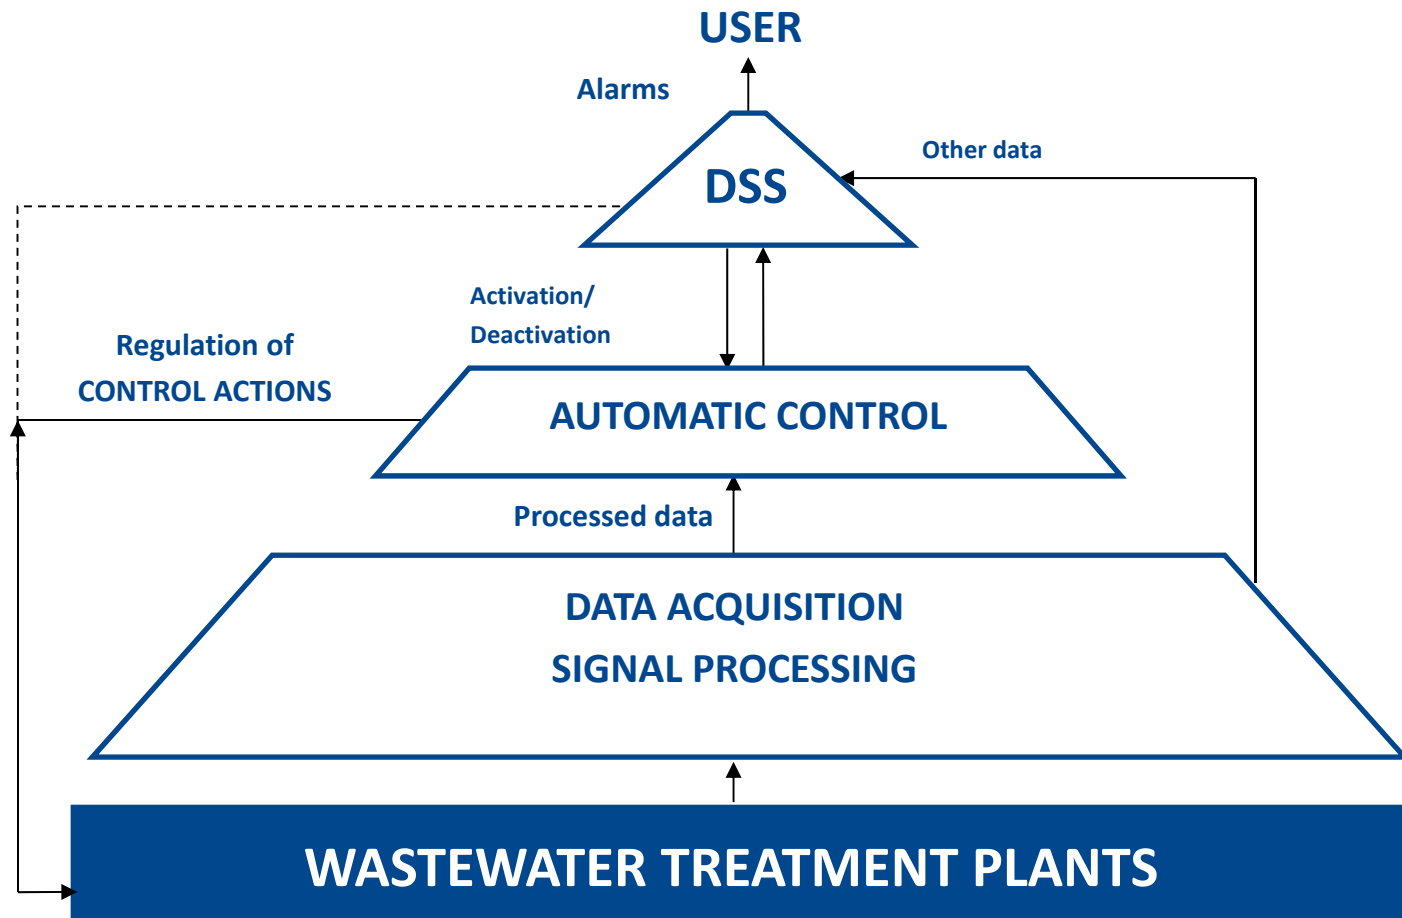

Decision support: rationale

Decision support: architecture

This event is co-financed by the European Commission through the involvement of several projects.

A joint event organized by:

Hosted by National Geophysical Research Institute (NGIR - CSIR).

Deliverables

- Establishment of an Indo-European Network (website, LinkedIn)
- Dissemination through workshops, webinars, publications in high reputed journals and oral/poster contributions
- New joint research project proposals (EU-FP7, bilateral programs between India and Belgium-Spain, funding from industries, CSIR-NCL and DST, India)
- Summer school (long-term)
- Exchange programs (e.g. Erasmus) for students (MSc, PhD), co-tutelle PhDs
- Broad impact on WWT practice, research field and education

Work Plan

- *November 2012*: kick off meeting at Hyderabad
- ***January 2013*: workshop at NIT Trichy + brain storm on project proposal**
- *June/July 2013*: UdG, Girona
- *December 2013*: meeting at PEC, Pondichery + finalize project proposal
- *April 2014*: workshop at UGent (in conjunction with WWTmod2014)
- *October 2014*: closing meeting at CSIR-NCL, Pune

1st Workshop: Jan 28-29 2013

- Location: NIT Tiruchirappalli (Seshagiri Rao)
- “Advanced Modelling Tools for Wastewater Treatment”
- Scope
 - WWT technologies, modelling incentives
 - Current state-of-the-art/challenges in WWT India/Europe (municipal and industrial)
 - Successful case studies (ASP (an)aerobic, MBR, AOP,...)
 - Perspectives in modelling (CFD, IUWS, climate change,...)
 - Panel discussion

Acknowledgement

- New Indigo
- Flanders Research Fund (FWO - Belgium)
- Ministry of Economy and Competitiveness (Mineco - Spain)
- Department of Science and Technology (DST - India)
