Technology Transfer and Business Opportunities Session

The technology transfer and business opportunities session will showcase successful business collaborations and technology transfers between Europe and India in the water and waste water sectors. The overview of the initiatives will be defined by the keynote presentations by EIRC and EBTC, followed by a panel discussion of experts from industry, research and business from Europe and India.

In this interactive panel discussion experts will share their success stories and will provide inputs on how to identify transnational business opportunities. They will conclude by tips to successfully manage international technology transitions.
